

Jeroen Boydens is an associate professor with the Faculty of Engineering Technology of the KU Leuven university. As the vice chair of the department of computer science he comes into contact with all researchers within this department spread over 10 different cities in Belgium. Jeroen Boydens has been a reviewer, section chair, conference co-chair and conference chair for a multitude of conferences in his domain of expertise. He has been a reviewer for numerous years for this ET conference papers in the embedded systems section. As well as for other conferences in his domain (International Conference on Dependable Systems and Networks (DSN), International Conference on Computer Safety, Reliability and Security (Safecom)) and journals such as International e-Engineering Services, IEEE Access, Proceedings of the IEEE, Advances in Science, Technology and Engineering Systems Journal, IEEE Transactions on Device and Materials Reliability, IEEE Embedded Systems Letters.

Founded in 1425, KU Leuven has been a centre of learning for almost six centuries. Today, it is Belgium's highest ranked university as well as one of the oldest and most renowned universities in Europe. KU Leuven is a leading European research university and co-founder of the League of European Research Universities (LERU). The university offers a wide variety of internationally oriented programmes. These programmes are supported by high-quality interdisciplinary research conducted at both the university and its internationally acclaimed hospitals. Boasting an outstanding central location in the heart of Europe, KU Leuven offers a truly international experience, high-quality education, world-class research, and cutting-edge innovation.
