

Stanislav Vitanov holds a degree in electrical engineering from the Technical University of Munich and a doctoral degree from the Technical University of Vienna.

He joined Infineon Technologies Austria in 2011 working for several years as process integration engineer for silicon-based power devices. His responsibilities included sustaining as well as ramp-up of new technologies and products. He later moved to technology development, focusing on process block development for low-voltage power technologies and studies of new product concepts. Since 2020 Stanislav Vitanov is heading a team working on GaN power technology development.
